

Ulyana Alper

BIM Coordinator

Experienced in BIM coordination, model quality control, and workflow development in multidisciplinary AEC projects. Skilled in Revit, Navisworks, IFC workflows, and CDE administration. Supports design teams and ensures consistent project delivery.

WORK EXPERIENCE

BIM Manager

Istudio Project

October/2025 - Present

Remote, Russia

Key Responsibilities

- Managed BIM coordination across multidisciplinary projects with varying scale and complexity (up to 158,000 m²)
- Developed and implemented BIM Execution Plans (BEP) and Employer's Information Requirements (EIR)
- Administered Common Data Environment (CDE) and Revit Server, ensuring structured data management and collaboration workflows
- Coordinated BIM processes and supported multidisciplinary design teams in Revit environment
- Performed model quality control, including clash detection and model validation using Navisworks
- Developed Revit automation tools using Dynamo scripts and optimized scheduling/specification workflows
- Created Revit templates, families, and internal BIM standards
- Developed technical guidelines and training materials for design teams on Revit workflows and automation tools
- Provided technical BIM support to project designers and coordinators

BIM Coordinator/BIM Modeler

Laatu

May/2025 - September/2025

Remote, Russia

Key Responsibilities

- Developed and modeled project sections (Architectural, Structural, and MEP) according to design team requirements and collaborated on design development
- Performed clash detection and resolution
- Created and customized Revit families according to project needs
- Prepared project and working documentation for release

BIM Coordinator/BIM Modeler

Terrasa

March/2024 - May/2025

Remote, Russia

Key Responsibilities

BIM Coordinator

- Coordinated BIM development across up to 10 disciplines
- Managed external BIM subcontractors and contract administration
- Established project BIM workflows, CDE structure, and IFC export mapping
- Developed federated models and performed clash detection using Navisworks and BIM Vision
- Reviewed model data and prepared IFC deliverables for regulatory submission and approval

BIM Modeler

- Developed multidisciplinary BIM models based on 2D CAD drawings across architectural, structural, and MEP disciplines
- Populated and validated model parameters for IFC export and regulatory submission

Design Engineer (Architectural & Structural)

Polyblock-Stroy

September/2023 - March/2024

Remote, Russia

Key Responsibilities

- Developed architectural and structural design solutions for individual residential projects (from concept to final documentation)
- Led all client communication throughout the project lifecycle
- Occasionally developed basic MEP sections (electrical and water supply)

Cost Estimate Engineer (Part-Time)

PSG

August/2021 - June/2023

Remote, Russia

Key Responsibilities

- Assisted in the preparation and maintenance of cost estimation documentation
- Processed revisions and corrections to cost estimates and supporting documents
- Maintained cost estimate registers and project documentation records

Cost Estimate Engineer (Intern)

PROMFINSTROY

July/2021 - August/2021

Krasnodar, Russia

Achievements/ Tasks

- Assisted in the preparation of cost estimation documentation
- Maintained cost estimate registers and project documentation records
- Prepared and compiled tender documentation packages
- Assisted in coordinating document approvals with clients and internal departments
- Incorporated comments and revisions into cost estimation documentation

EDUCATION

B.Sc. in Industrial and civil engineering of unique buildings and constructions

Peter the Great St. Petersburg Polytechnic University

Sep/2019 - June/2023

St.Petersburg, Russia

GPA: 4.4/ 5.0

Thesis work

A business center building with a height of 128 meters featuring a vibration-isolated foundation

- Building design including the following disciplines: Architecture (AR), Structure (SR), Site Development, Construction Organization Project, Technological Solutions, Fire Safety, Accessibility for People with Reduced Mobility, Cost Estimation
- Creation of an informational 3D model of the building (Autodesk Revit)
- Development and visualisation of a project schedule (Microsoft Project, NavisWorks Manage)
- Investigation of the foundation vibration isolation for a multi-story building exposed to subway influences using a vibration-isolating layer.

SKILLS

Engineering

- Autodesk Revit, NavisWorks Manage, Autodesk AutoCAD

Additionally

- SCAD, Microsoft Project, BIM Wizard, BIMVision, TwinMotion, Lumion
-

LANGUAGES

Russian

Native or Bilingual Proficiency

English

Upper Intermediate (B2)

Turkish

Elementary (A2)
